

SUBNET

SubSTATION Studio 2015

Unified Substation Configuration

SubSTATION Studio 2015 unites all of SUBNET's SubSTATION Server configuration tools into a single package suitable for maintaining all of your substation configurations. Instead of installing multiple versions of SubSTATION Server to use as editors for your configurations, SubSTATION Studio provides a single source for creating, updating, and upgrading all software versions in a safe, offline environment.

SUBNET SubSTATION Studio 2015

Unified Substation Configuration

SubSTATION Studio 2015 is a latest generation configuration tool designed to create, update, and upgrade substation configurations.

SubSTATION Studio 2015 empowers you to manage all of your in-service SubSTATION Server configurations within a single, stand-alone tool. It eliminates the single-version-per-installation restriction of previous SubSTATION Server configuration tools to deliver a unified development environment capable of creating and maintaining configurations for any version of SubSTATION Server.

In addition to being a single point of configuration, SubSTATION Studio 2015 delivers a consistent and modern look and feel with the standard features you expect of any Windows-based application.

Manage All Your Configurations Offline

- No need to uninstall and reinstall multiple versions of SubSTATION Server
- Move configurations from SubSTATION Studio to your lab and in-service SubSTATION Server installations with ease

Safe and Easy SubSTATION Server Upgrades

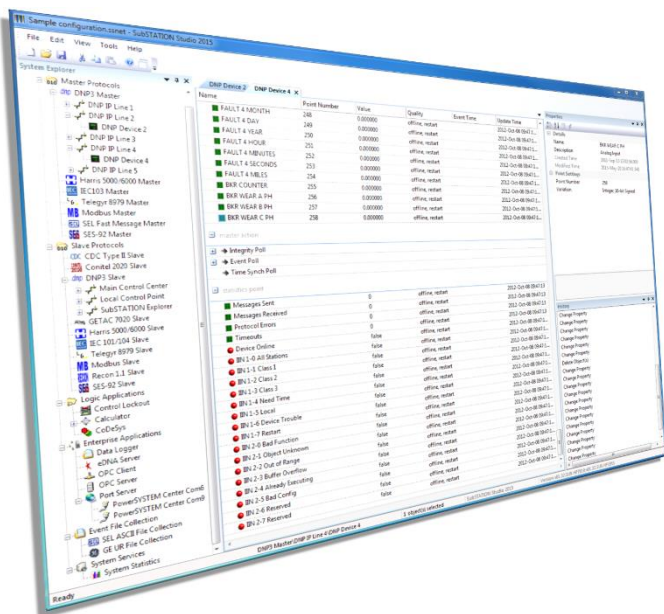

- Upgrade the configuration of any version of SubSTATION Server to any newer version
- Full support for all major releases *and* all hotfixes
- Includes SubSTATION Server's complete application library

Customizable Interface

- Quickly access your more frequently-used commands via completely programmable hotkeys
Why this is cool
- View or hide standard menu and status bars to maximize your editing area
- Add and customize your toolbars for speedy access to commands
- Show and hide toolbars on demand depending on your current activities
- Create and edit context-sensitive menus to bring desirable commands into focus as you navigate between windows

Detailed Edit History

- SubSTATION Studio records all user actions and displays them in a single history window
- Undo and restore actions simply by clicking on the appropriate command within the history window

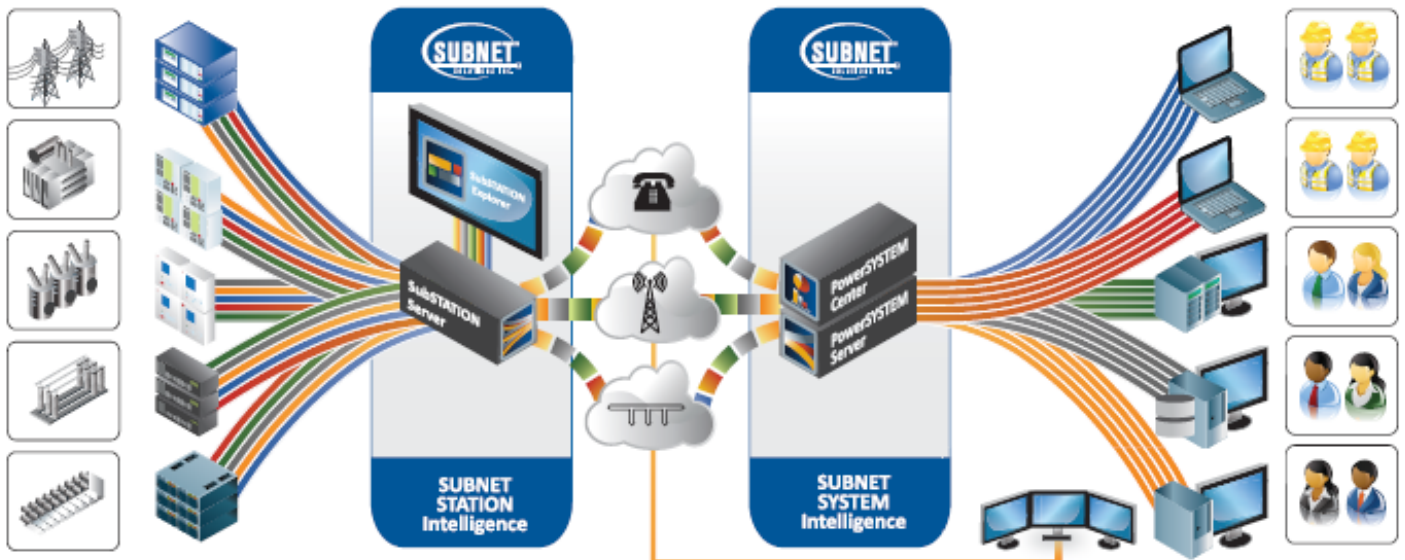

Consistent and Modern Style

- Context-sensitive properties window switches focus to whatever object you select
- Standardized labels and terminology minimize transition differences between services
- Tab-based design lets you keep multiple windows open simultaneously for faster navigation
- Window panes can be detached to float independently or docked in whatever layout maximizes your workflow
- Choose between several Windows, Office, and Visual Studio styles to match your preferred look and feel.

Advanced Productivity Tools

- Create templates for any device to quickly and easily create end devices
- Copy and paste data through Excel to leverage Excel's formula and formatting tools to rapidly replicate and manage point data
- Connect live to devices via device-specific online wizards to import settings and point data
- SubSTATION Studio's powerful automapping engine lets you create flexible logic to automatically map device point data from master/client drivers into any combination of slave/server connections to instantly populate your master station and historian data maps

Official Solution of the Unified Grid Intelligence Technology

Making Power Grids More Intelligent®

SUBNET SubSTATION Studio 2015 is part of SUBNET's Unified Grid Intelligence philosophy. This holistic approach provides interoperable solutions between many different field devices, to many different business systems, over many different types of communication networks. The goal of these solutions is to provide true multi-vendor, multi-function interoperability. SUBNET's solutions integrate with utilities' existing IEDs, IT networks, and engineering productivity tools to deliver data efficiently and securely to analysts, maintenance personnel, engineering departments, and operations.

About SUBNET Solutions, Inc.

SUBNET Solutions Inc. is a global software solutions provider for electric utilities. SUBNET focuses on Making Substations More Intelligent®.

Founded in 1992, SUBNET is an industry leading provider of intelligent solutions that securely connect real-time electric utility field information with utility business systems to enable smart grid solutions. Over 200 utilities worldwide rely on SUBNET software to safely manage and monitor thousands of substations.
